DETAILED ACTION

1. This office action is in response to the Supplemental Request for Reconsideration filed June 06, 2005.

Accordingly, a declaration under 37 CFR 1.132 by the present inventors is submitted with this paper.

Currently, claims 8-20 were cancelled, and claims 1-7 and 21-43 are pending in this application.

Allowable Subject Matter

2. Claims 1-7 and 21-43 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly suggests or shows all of the limitations as claimed. Specifically,

None of the prior art of record discloses, in combination with other limitations as claimed, a polarizing film having an absorbance comprising an absorption peak A in a wavelength range of 550 to 650 nm and an absorption peak B in a wavelength range of 450 to 520 nm, and an absorbance characteristics ratio of (absorption peak A/absorption peak B) is no more than 1.5, wherein the absorbance peaks are measured after arranging the polarizing film in a crossed Nicol,

wherein, re claim 1, the polarizing film comprises a non-UV-treated stretched film containing iodine;

wherein, re claim 37, a retardation of the film measured using a light having a wavelength of 900 nm does not exceed 1100 nm; and

wherein, re claim 41, the polarizing film comprises a stretched film containing iodine and having a stretching ratio of no more than 50%.

It is noted that the absorbance peaks are shown by Applicant in Fig. 1 in the declaration filed September 15, 2003.

The first most relevant reference, USPN 5,925,289 to Cael et al. (Cael), fails to disclose or suggest the claimed inventions. As shown in Fig. 2C, Cael only discloses a polarizing film comprising a non UV-treated stretched film containing iodine (curve 1), wherein an absorption peak of about 3.1 in a wavelength range of 300 to 400 nm and a plurality of absorption peaks in a wavelength range of 450 to 520 nm. Cael also shows that the polarizing film is arranged in a crossed Nicol.

The second most relevant reference, JP 2001-091736 to Kusumoto et al. (JP'736), discloses every limitations of the claimed inventions. However, JP'736 is overcome by a declaration under 37 CFR 1.132 by the present inventors filed on June 06, 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
